About the Elementor Page Builder Plugin

Website · https://horshamu3a.org.au/docs/about-the-elementor-page-builder-plugin/

There are two versions of Elementor Page Builder installed on the website. the basic El;ementor program includes the files to run the plugin and the Pro version of the plugin which allows for additional features. The basic version of Elementor is free, however the Pro version does require an annual fee; I have included the U3A website on my license and allowing you to use it free of charge.

You can use the Elementor page build to edit or to create additional pages for your website.

Creating a new page

To create a new page, login to your WordPress Dashboard and from the menu on the left hand side, choose PAGES -> ADD NEW. This follows the same steps as previously described in Making a New Page. Then click the blue EDIT WITH ELEMENTOR button.
